

Isabel Contreras, PA-S

Shenandoah University School of Health Professions

Progress in 2021-2022

- Beginnings of interest amongst graduate students
- Guest Lectures: Dr. Nick Snow on Heat and Health Impacts and most recently the Microbiome.
- Formation of the climate change elective: HP 560
 - Available to all school of health profession students
 - Ten-week elective course
 - Successful outcomes; several projects emerged from the course and has received positive feedback

Our Results

Guest Speakers and Recommended Textbook

- Dr. Sam Adhoot

- Rep. Wexton VA-10
- Professor Maibach
- Dr. Neelu Tummala
- Prof. Laurel Kearns
- Dr. Tim O'Mara
- Dr. Kelsey Hudson

JAY LEMERY, MD, AND PAUL AUERBACH, MD

ENVIROMEDICS

THE IMPACT OF CLIMATE CHANGE
ON HUMAN HEALTH

Looking to the future

- Continuation of our course in the 2022 summer calendar year
 - In-person and virtual options will be available
 - Students in the health professions and school of public health are eligible to partake in the course
 - Continue to promote and encourage involvement in this course
- Student interest group formation
 - Open to all healthcare professional students at the university
 - Hoping to form an on-campus group to continue our work in the future
